

TOP 5 Things You Should Know About Zenoss and AWS

1

Zenoss Provides Software-Defined IT Operations™ for AWS

Zenoss works with the world's largest organizations to ensure their IT services and applications are always on. As the leader in Software-Defined IT Operations, Zenoss develops software that builds comprehensive real-time models of hybrid IT environments, providing unparalleled holistic health and performance insights. This uniquely enables Zenoss customers to predict and eliminate outages, dramatically reducing downtime and IT spend.

2

Zenoss Helps Customers Maximize AWS Value

Zenoss provides complete monitoring and analytics for the most complex and dynamic hybrid IT environments that include Amazon Web Services (AWS) instances. Zenoss AWS monitoring provides quick and precise insight into potentially affected applications and services on AWS, which enables enterprises to address system and application issues before disruptions occur. The end-to-end visibility and performance data help customers make better decisions and design applications for improved resiliency with automated remediation. Zenoss is available in the AWS Marketplace.

3

Zenoss is Available in the AWS Marketplace

Zenoss is available in the AWS Marketplace. This greatly increases the speed of delivery for AWS customers – allowing them to purchase immediately through Amazon with Zenoss software appearing as line items in their AWS bills.

4

Zenoss Enables Uninterrupted Cloud Migration

The Zenoss platform not only allows customers to monitor the health of their AWS environments but also enables uninterrupted operations before, during and after a migration to the AWS cloud. Using specialized AWS monitoring in cloud migrations, Zenoss helps identify system interdependencies and redundant equipment to eliminate the cost of transitioning unnecessary systems.

5

Zenoss is a Trusted Amazon Technology Partner

Zenoss is an agentless, resilient, centrally managed platform that accelerates time to value. With simple, capacity-based pricing, Zenoss enables customers to deploy AWS monitoring and unified hybrid IT monitoring at scale. Zenoss ensures global support, professional services and advanced partner offerings for AWS environments.
