Corporate Fact Sheet

zenoss

ZENOSS RECOGNIZED AS A

LEADER IN INTELLIGENT APPLICATION AND SERVICE MONITORING

Zenoss delivers SaaS-based full-stack monitoring and AIOps insights at any scale. We provide an intelligent IT operations management (ITOM) platform by building the most granular and intelligent infrastructure relationship models possible at any scale. Zenoss Cloud provides robust AIOps analytics capabilities for all data types, including metrics, dependency data, events and streaming data. It proactively delivers deep, unparalleled health and performance insights to optimize any IT environment and shares insights with other ITOM tools to automate issue remediation. Using Zenoss, our customers:

Monitoring Tools

IMPROVE MEAN TIME TO RESOLUTION (MTTR)	REDUCE ALERT NOISE AND EVENT STORMS	INCREASE ITOM SYSTEM AUTOMATION
85%	**99.99%**	**70%**

Immediate Root-Cause Analysis

Gain ultimate visibility using real-time modeling for end-to-end infrastructure-related risks, and isolate problems immediately to improve MTTR and eliminate service outage losses.

Predictive Analytics

Leverage high-cardinality data to ensure continuous reliability of ephemeral systems and reduce IT response times using machine learning.

Application Performance Optimization

View performance and anomalies across all on-premises and cloud infrastructures to predict service health and performance issues.

Intelligent Automation

Share key data and insights with other ITOM tools to automate a rapid resolution and future-proof your monitoring platform to run at any scale.

Zenoss provides these benefits to clients quickly through our SaaS platform, continuously leveraging the latest innovations and technologies while minimizing management overhead so our customers can focus on the infrastructure priorities that matter.

We believe that by making our customers successful, we ensure our own success.

FORRESTER®

WAVE LEADER 2019

Intelligent Application And Service Monitoring

"

Zenoss strategy emphasizes simplifying integration across multiple IT data sources and corporate analytics systems … Customers that have large volumes of disparate data sources and need a highly scalable solution should consider Zenoss.

NUTANIX

No other solution provides the complete coverage that Zenoss does. Our IT environment is quite dynamic, and other solutions weren't nimble enough to keep up and definitely couldn't model the entire environment in real time
